

The mobility experts from Aachen

Corporate profile elexon GmbH

elexon is the industry leader for customized electric charging solutions in the logistics sector with 100% development and manufacturing "Made in Germany" and operates as a 360° charging infrastructure and energy management provider.

An essential part of elexon's brand message is their commitment to "Made in Germany" and sustainability, as well as their comprehensive "full-service" philosophy. In addition to helping customers select the right charging columns (AC/DC), the Aachen-based e-mobility expert's product and service portfolio includes site analysis, network capacity checks, subsidy consulting, billing systems, load and charging management, excavation and metalwork, installation, service and maintenance.
