

## Hardware and software combined for convenient charging infrastructures

# elexon and coneve confirm cooperation agreement for maximum charging convenience

elexon, 360-degree system integrator for charging infrastructure solutions and industry leader in logistics, announced today that it has signed a cooperation agreement with coneve, turning a long-standing cooperation into a strong foundation for new e-mobility developments and projects. The Munich-based company coneve is a corporate start-up of SMA Solar Technology AG (SMA), one of the world's leading specialists in photovoltaic system technology, and specializes in intelligent energy and load management. The goal of this partnership: maximum efficiency and comfort in fleet charging.

Aachen, 22.02.2022

- **elexon & coneve: A partnership for convenient fleet charging**
- **Leading e-mobility experts in their field combine hardware and software**
- **A high level of expertise and top consulting services for your projects**

Two top industry leaders are joining forces to advance individuality and efficiency in the development of smart charging infrastructures; synergies generated by hardware and software, combined to create convenient and highly efficient charging solutions. Thanks to the cooperation agreement between elexon and coneve, fleet customers will benefit from charging infrastructures with intelligent, individual charging solutions that are coordinated down to the very last detail. Interfaces between the charging solution and the energy, load and billing system are further optimized while handling convenience is increased. "We look forward to joint projects and solutions that offer our customers even more flexibility for their charging infrastructures," says the Managing Director of elexon GmbH, Marcus Scholz.

### **Because details matter**

The 360-degree service philosophy is firmly anchored in both companies. elexon, as a full-service system integrator with a wide range of consulting services pertaining to project steps, offers advice on all aspects of choosing the right charging stations, site analyses, network capacity checks, subsidies, billing systems, installation, service and maintenance. In addition to their comprehensive services, elexon is committed to a consistent "Made in Germany" philosophy. Development and production in Germany and the resulting highly individualized services form the basis of elexon's AC and DC charging solutions.

coneva's digital services and solutions help customers analyze and optimize their energy supply and costs, as well as their environmental footprint. Their portfolio ranges from intelligent load management and optimized energy management to automated billing processes. „We focus on software-based services. This makes energy production and efficient consumption easy for our customers.“, explains Jochen Schneider, Managing Director of coneva GmbH. The goal of both companies: holistic, climate-neutral charging solutions for smart e-mobility that are suitable for everyday use.

### **About elexon**

*Elexon is a joint venture of SMA Solar Technology AG (SMA), AixControl GmbH and aixACCT charging solutions GmbH founded in 2019 with the goal of promoting the expansion of charging infrastructures for electric vehicles across Europe.*

*Elexon is a full-service provider and, thanks to the merger, now has access to all the necessary expertise from the field of electromobility. It focuses on charging infrastructures, energy and load management, and the provision of electricity through renewable energies.*

*With its 360° charging infrastructure solutions, elexon offers its customers single-source, holistic plug-and-play solutions for the planning, installation and service of efficient e-vehicle charging parks.*

### **About coneva:**

*coneva brings private and commercial energy consumers, as well as producers together. In addition to its solutions for e-charging infrastructures, including dynamic load management, coneva provides a long-term holistic approach by means of energy monitoring and management.*

*With their 360° solutions, they support their customers in analyzing and optimizing the decentralized supply of energy, energy costs, and their ecological footprint. They take advantage of digital networking and use smart technologies and data analytics as the basis for a resource-efficient and cost-effective energy system.*

*coneva GmbH is a subsidiary of SMA Solar Technology AG, a leading global specialist in photovoltaic system technology.*
